

Weed burner without herbicide

- with infrared burner
- no naked flame
- silent operation
- economical gas consumption

GB

infraweeder.ch

The intensive infrared radiation targets weeds and flying seeds, bursting their protein cells and immediately initiating the wilting process.

The handy Lady model is the ideal device for the garden and is particularly suitable for the targeted removal of weeds. This versatile device enables optimum use on paving joints, path edges and flowerbeds. Gas cartridges are standardised and also available from specialized dealers.

Lady

Technical data

Weight of device with cartridge: 1.7 kg
 Gas content: 330 g
 Gas consumption: 125 g/h
 Operating time per cartridge: 2.5 h
 Burner surface: 8.5 x 17 cm
 Burner temperature: 950 °C
 Period of application: approx.: 3 s
 Igniter: Manual using lighter
 Testing: DVGW
 Manufacture: Switzerland
 Warranty: 2 years
